PROFESSIONAL SUMMARY

Software developer with 3+ years of personal, project-based web development experience and training in Full-Stack Engineering. Builds responsive web interfaces and develops practical application features using modern JavaScript technologies. Familiar with Node.js backend development, REST APIs, MongoDB, debugging, and software quality assurance practices. Interested in software development, AI training and evaluation, and quality-focused technology work.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Vite, Tailwind CSS, Bootstrap, responsive design

Backend & Data: Node.js (intermediate), Express.js, REST APIs, MongoDB, Python

Additional: React Native, NativeWind, React Query, Git, GitHub

Quality Assurance: Smoke testing, sanity testing, regression testing, exploratory testing, software verification and validation, bug identification and reporting

SELECTED PROJECTS

INKY — Web-Based Drawing and Animation Application

- Developing a browser-based creative application using React.js, Vite and Tailwind CSS.
- Building interactive drawing tools, canvas functionality and customizable brush properties.
- Structuring reusable components to support planned animation and timeline features.

GLOOB — Community-Based Social Platform

- Developing a community-focused social platform inspired by Reddit, Discord and Instagram.
- Exploring niche communities, user interaction and content-sharing functionality.
- Contributing to the platform's application structure and ongoing development.

Personal Portfolio Website

- Designed, developed and deployed a responsive portfolio website using modern web technologies.

EDUCATION

Redeemer's University, Nigeria — Information Technology

Bachelor's degree in progress | Expected graduation: 2027

CERTIFICATION

Full-Stack Engineering Course — AppClick Africa

Certificate of Achievement | 25 August 2025
